AWARDS
OF EXCELLENCE
BEST IN SHOW

Unilock Awards of Excellence **BEST IN SHOW**

At Unilock®, we believe the beauty of our products can only be fully realized through the outstanding design and installation skills of professional contractors. Because of this, we recognize and celebrate the best in design and installation with our annual Unilock Awards of Excellence competition. In place since 1994, the AOE is held at each Unilock location and showcases the best projects amongst hundreds of entries across various categories. For the past three years we have awarded a Best in Show prize to the most outstanding overall project, selected from all our regional winners across the U.S. and Canada.

This year's Best in Show winner is Ramos Masonry from Johnston, Rhode Island. They designed and installed this impressive driveway and pool deck. Instead of using one paver throughout, they used multiple pavers to add layers of visual interest. The driveway entrance featuring Tribeca Cobble and Courtstone, is used as a transition to the courtyard area, covered entirely in Thornbury. In addition to the driveway, Ramos Masonry also created a stunning pool deck and patio using Unilock Natural Stone.

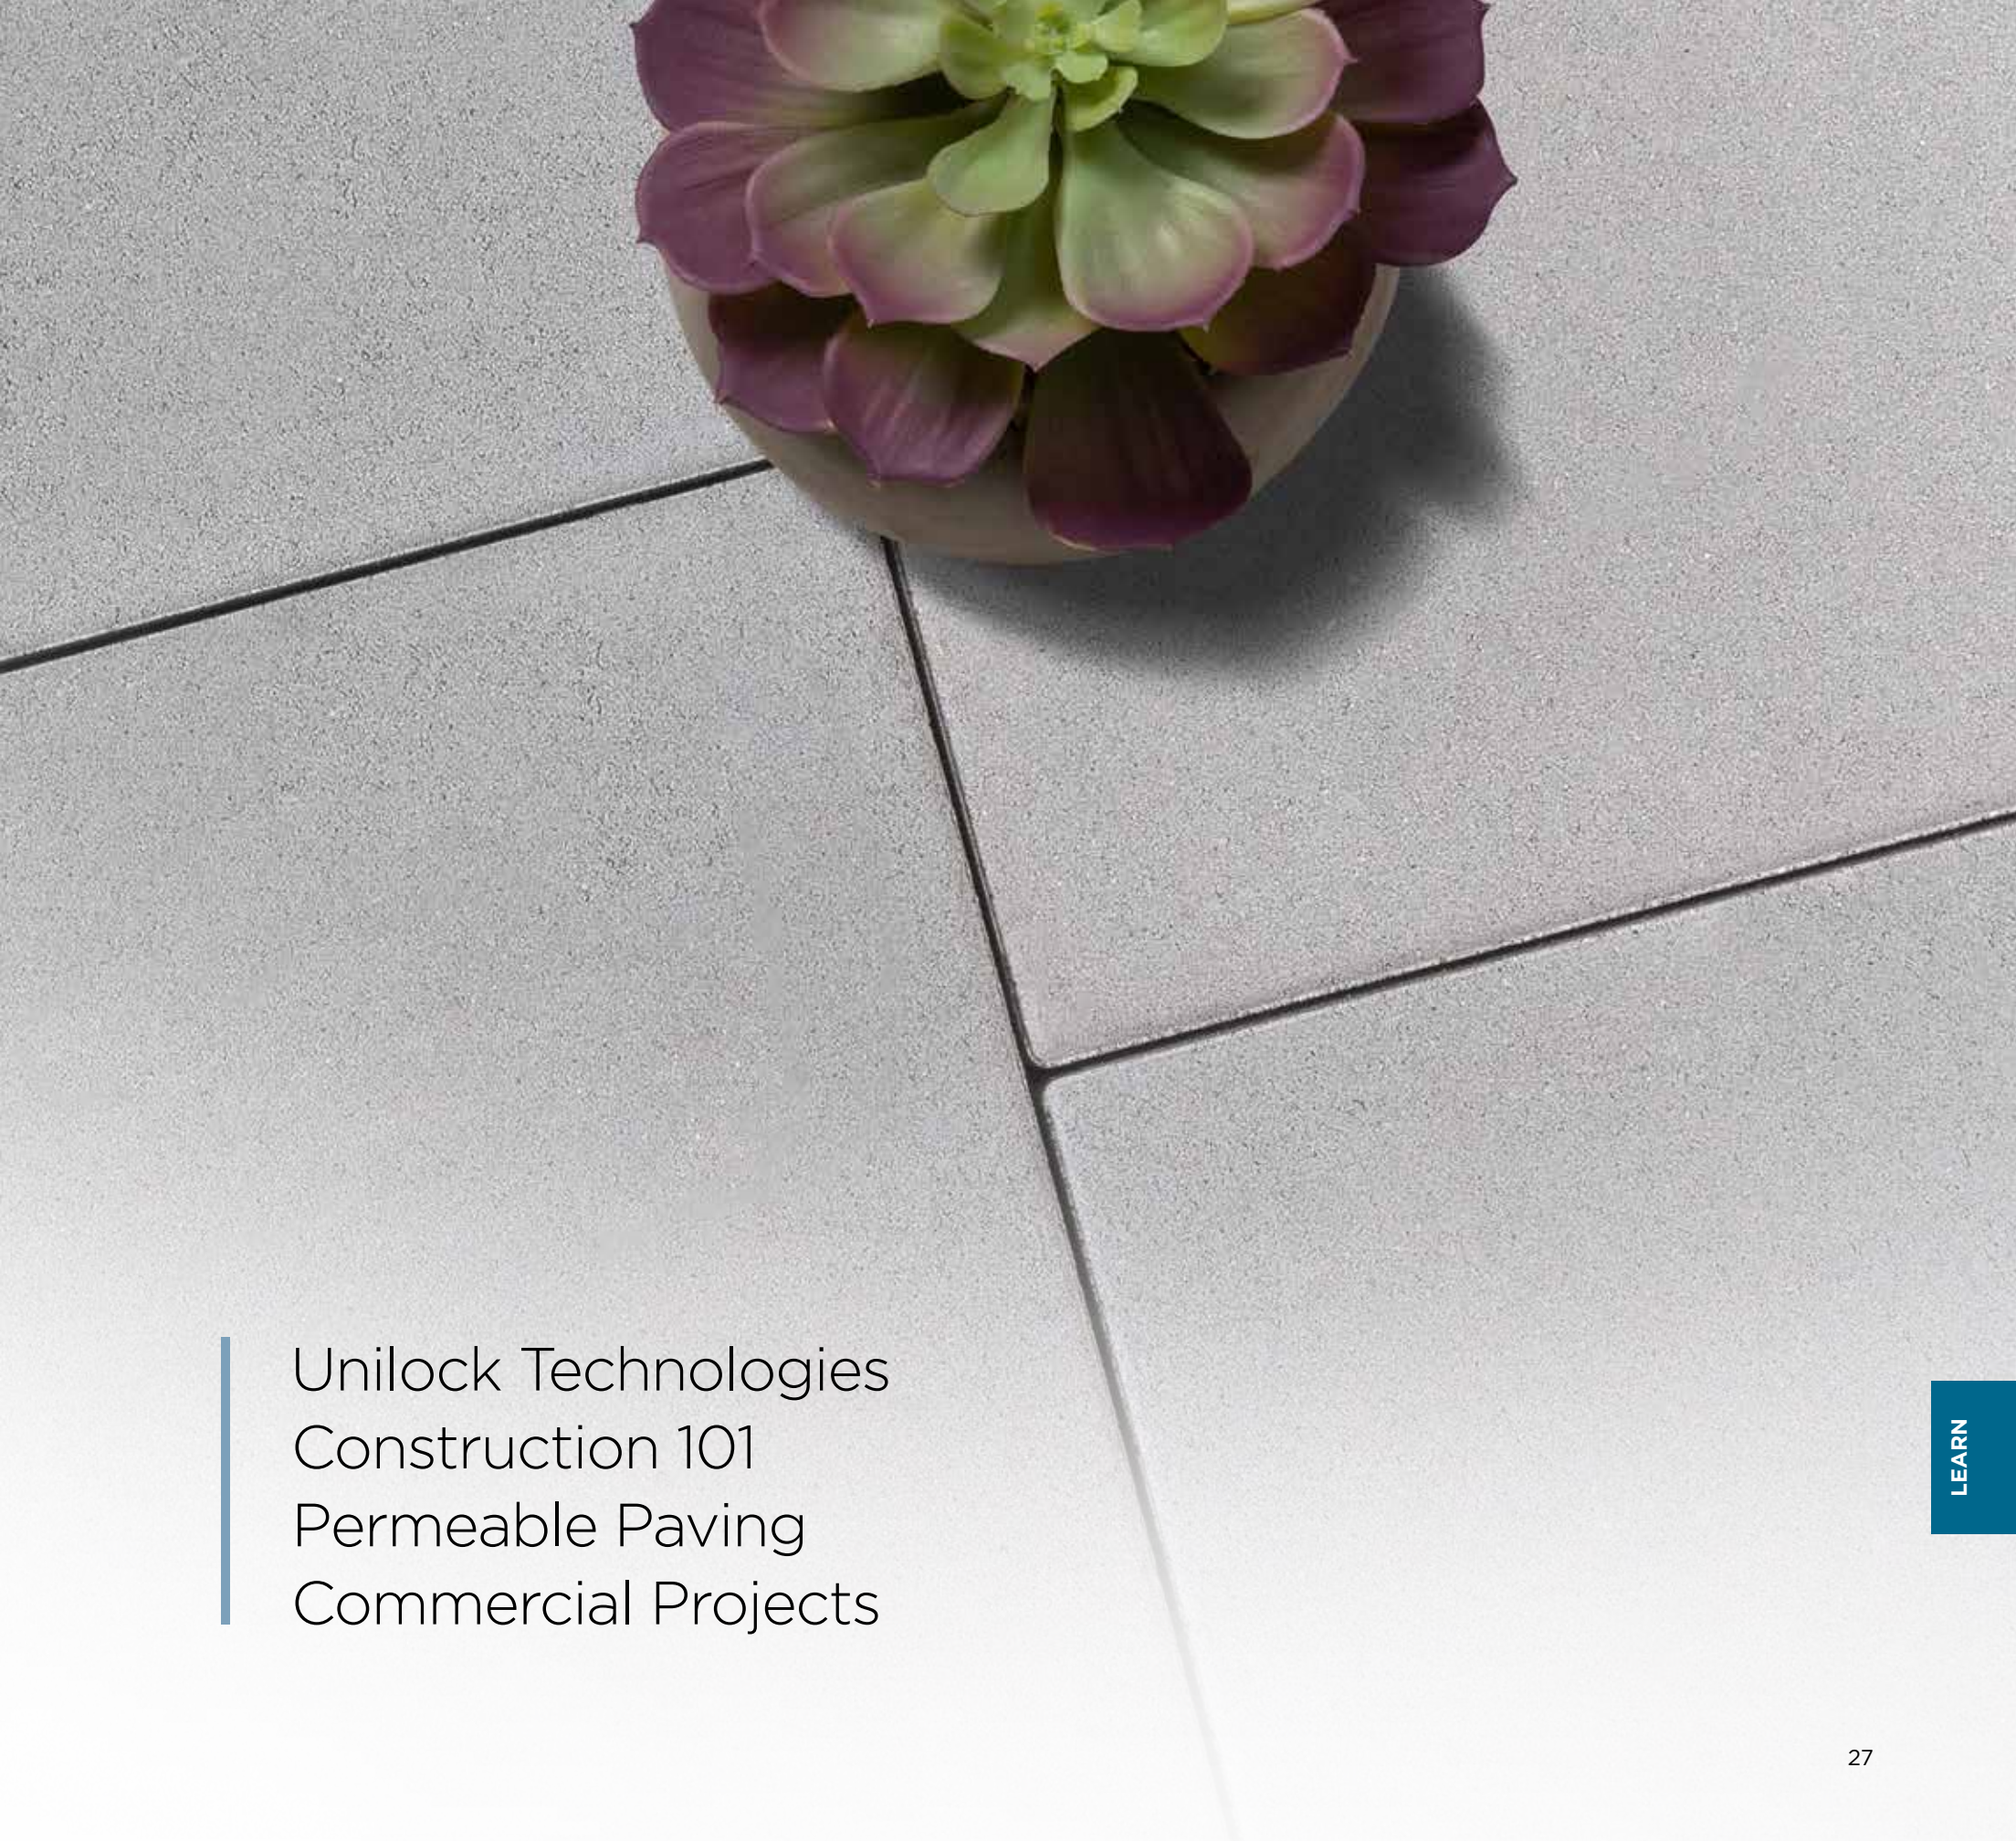
LEARN

LOOK BEYOND THE SURFACE

There's more to a successful project than what you see on the finished surface. The construction of the base and the technology that goes into the products you choose, will determine how it looks in the years to come.



Unilock Technologies
Construction 101
Permeable Paving
Commercial Projects

UNILOCK®

THE ORIGINAL AND STILL THE BEST

All products are NOT created equal. Many products look great when they're first installed, but after time the difference in quality shows. For over 45 years, the very best designers and contractors have relied on Unilock to supply cutting edge paving and wall products that enable them to build extraordinary projects that stand the test of time.

Today, we remain the **only company** in North America with memberships in Eurobeton and Stein + Design, two **prestigious European concrete product innovation groups.** These exclusive relationships continue to put us on the leading edge of style and technology.

CONCRETE AT ITS BEST

GOOD **CLASSIC**

Our budget-friendly, Unilock Classic pavers and walls are manufactured to exceed ASTM standards for quality and strength. Available in classic shapes and styles, these products utilize a traditional **product mix of large and small aggregates** that's consistent from top to bottom with color mixed throughout.

BETTER ENDURACOLOR™

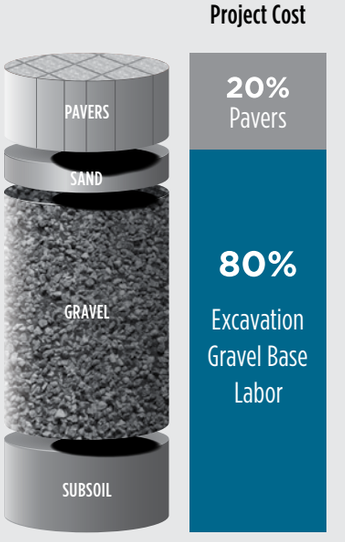
The refined surface of Unilock EnduraColor products is achieved with a **two step manufacturing process** that combines a base of coarser aggregates for a **stronger foundation,** with concentrated color and **wear-resistant finer aggregates on top.** This process protects the surface from the appearance of fading over time because the top layer prevents large, lighter color aggregates from ever showing through.

BEST ELEGANCE™

Deep, rich colors and a multitude of **unique Reala™ textures** combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can't get anywhere else, and thanks to Ultima Concrete, the look you purchase is the look that will last, with up to **4x the strength** of poured in place concrete.

The cost of pavers is only a small portion of the overall project budget.

DON'T COMPROMISE



Construction Cross Section

EXCLUSIVE UNILOCK® TECHNOLOGIES

REALA™

A multitude of natural stone surfaces, brick and historic cobblestones were cast to create Unilock products utilizing Reala technology. The result is a wide variety of authentic textures with consistent dimensions which are more cost efficient to install.

REALA TECHNOLOGY PRODUCTS:
COPTHORNE®, COURTSTONE®, RICHCLIFF®, RIVERCREST® WALL AND TOWN HALL®

ULTIMA™

Only Unilock has the technology to manufacture Ultima Concrete here in North America, resulting in pavers and walls with up to four times the strength of poured concrete. The look you purchase is the look that will last.

ULTIMA CONCRETE TECHNOLOGY PRODUCTS:
COPTHORNE®, COURTSTONE®, RICHCLIFF® AND TOWN HALL®

COLORFUSION™

Color and granite particles are randomly dispersed using proprietary ColorFusion technology to achieve a unique mottled surface that resembles natural granite.

COLORFUSION TECHNOLOGY PRODUCTS:
UMBRIANO® AND U-CARA®

EASYCLEAN™

Unlike after-market sealers which merely coat the top, EasyClean goes beyond the surface and becomes integral to the product during manufacturing. The result is enhanced surface color and protection from stains.

EASYCLEAN STAIN RESISTANCE PRODUCTS:
ARTLINE™, BRISTOL VALLEY®, SENZO® AND UMBRIANO®

There are two EasyClean Factors (CF®) to choose from:

CLEAN FACTORS (CF)	CF 90	CF 100
Pavers are pre-sealed at the factory	*	*
Enhanced resistance to weathering	*	*
Reduced dirt absorption	*	**
Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove	*	**

CONSTRUCTION 101

The long-term performance of your project is determined by the **quality of the work** that's done to prepare the base **below** your pavers and walls.

A proper base will ensure that your pavers and walls won't settle or shift out of place with freeze-thaw cycles.

1 | EXCAVATION

The first step in any project is excavation of grass and topsoil.

The depth will depend on two factors:

- **Soil Type** - Clay soil requires deeper excavation; sandy soil requires less.
- **Use** - Heavy loads like driveways and retaining walls require deeper excavation; lighter loads like patios and walkways require less. Depth of excavation can be reduced by adding DriveGrid™ once the soil has been removed.

2 | GRAVEL BASE

The excavated area will be filled with a **base gravel.**

This gravel base needs to be:

- **Strong enough** to handle the load of whatever is placed on the surface.
- **Free draining** so that water drains out of the base into the subsoil. Retaining walls may require a perforated drain pipe in the gravel base to direct water away from the base of the wall.
- **Extended** at least six inches beyond the edges of the finished paver surface.
- **Compacted** in several layers, using the proper equipment.

3 | BEDDING LAYER

A 1" (25mm) layer of sand or tiny stone chips is spread out and smoothed on top of the solid gravel base. This layer allows paver or wall units to be leveled or sloped for smoothness and drainage. Some contractors may recommend a poured concrete surface instead of a typical bedding layer, which is fine as long as the concrete is accurately poured and sits on a stable and well-drained base. ***Note:*** *Once concrete is poured, the height of paver or wall units can no longer be adjusted.*

4 | RESTRAINT SYSTEM

For pavers, an edge restraint will be secured with long metal spikes to prevent perimeter pavers from drifting out. For walls, glue may be used to secure rows of blocks and for larger retaining walls may require geogrid may be used every few layers to secure the wall into the soil that is being retained.

5 | JOINT MATERIAL

The color you choose for joint material impacts the overall aesthetic. It also plays an important role between pavers, in keeping weeds and other debris out. Your contractor can help you decide which joint material is right for your project.

BLACK SAND | TAN SAND | GREY SAND

Visit Unilock.com for joint material recommendations by product.

There are two types of joint material to choose from:

Basic Jointing Sand – Years ago, this was the only joint material available. As it wore away, issues with weeds could arise. If you choose a basic sand, we recommend that you use a joint stabilizing sealer and be prepared to replenish the sand when needed.

Polymeric Sand – This special sand stays in place longer because it is combined with a binding agent. However, it's not right for every project and needs to be installed with care to prevent hazing.

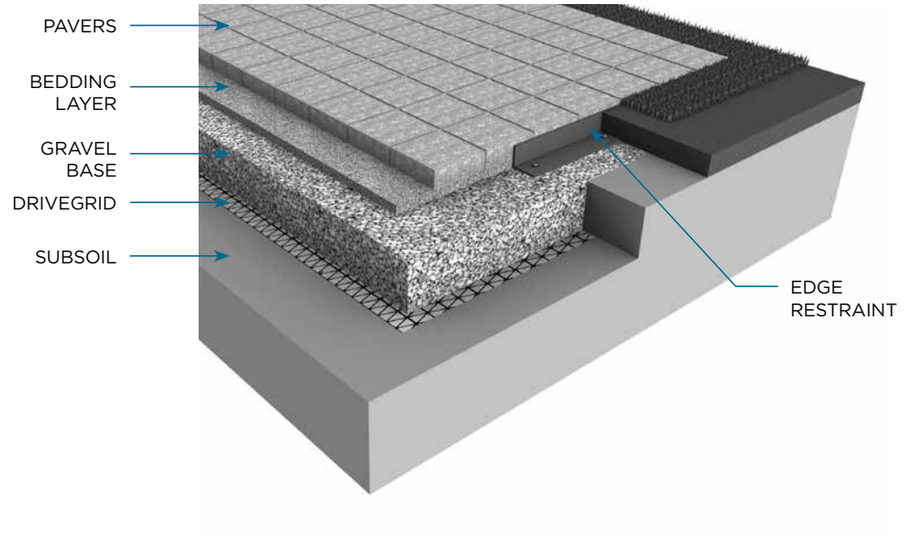
6 | SEALING

Unilock pavers will be durable with, or without, a sealer. Some homeowners choose to apply a sealer to enhance the color of the pavers, while others choose to appreciate the color of the pavers as they are. Some Unilock pavers are sold factory sealed. If you choose to seal, you should plan to re-seal every 3-5 years.

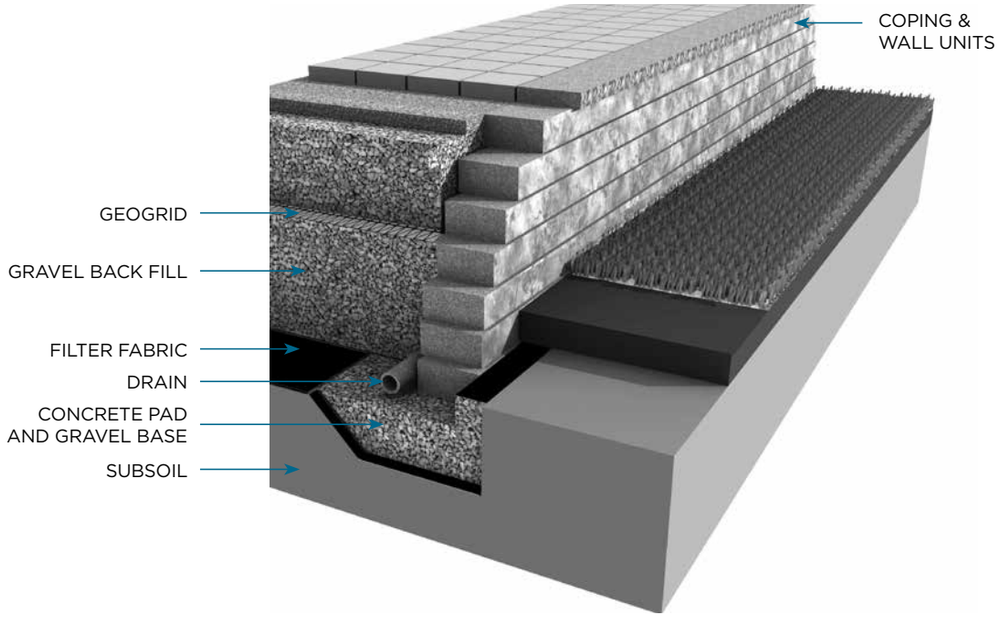
REMEMBER A quality project relies on a quality foundation. We recommend hiring a professional contractor.

Need help finding a qualified contractor?
Call us at **1-800-UNILOCK** or register online at **Unilock.com** and we'll match you with a Unilock® Authorized Contractor in your area.

PAVER CONSTRUCTION



WALL CONSTRUCTION



PERMEABLE PROJECTS **A GREENER CHOICE!**

More and more homeowners are installing **permeable** paver projects to help direct rainwater away from storm sewer systems and back into the **natural ecosystem.**

We take pride in offering the widest selection of permeable pavers in North America. From traditional finishes such as Town Hall®, the only rustic style permeable paver in North America, to the contemporary styling of Eco-line®, there is a permeable Unilock product to suit any project.

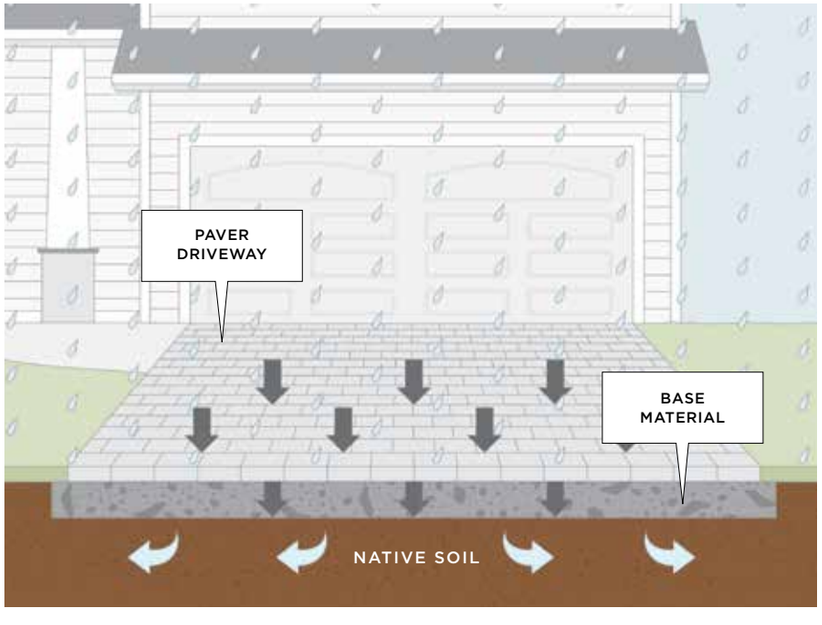
Look for these Unilock Permeable Products:

Eco-Optiloc™
Eco-Priora™
Thornbury™
Town Hall®
Tribeca Cobble™

The pavers used in a permeable installation look similar to traditional pavers, but are made with extra space between them so rainwater can more easily flow back into the earth below.

Special materials are used in the permeable base and joints to encourage water to flow through.

Some homeowners install rainwater collection systems underneath their paver projects to supply water to in-ground sprinkler systems!



INTERESTING FACT **Permeable pavers will accumulate less ice because water drains from the paver surface before it has time to freeze.**

PROJECT MAINTENANCE

WEEDS CAN BE PREVENTED

When a proper base is installed, there is no soil directly beneath your pavers from which weeds can grow. However, if the joints are not kept full with jointing material, it is possible for dirt and weed seeds to blow in from the surrounding area and germinate in the joints.

In the past - a basic sand was the only jointing material available. Unless it was replenished regularly, rain would erode the sand, leaving joints vulnerable to weeds.

Today - new varieties of sand stabilizing compounds and polymeric jointing material are available which **relieves homeowners from this maintenance burden.** See page 31 for more information on jointing material choices.

A SOLID FOUNDATION PREVENTS SETTLING

When the base of your project is properly constructed, water will not accumulate underneath and cause settling.
See page 30 for more information on proper construction.

TO SEAL OR NOT TO SEAL

Some homeowners choose to apply a sealer to their project surface when it's finished, to enhance the color of their pavers. Others choose to appreciate the color of the pavers as they are. Unilock pavers will be durable with or without a sealer. If you choose to seal your project after its installed, you should plan to re-seal every three to five years.

THE CHOICE OF DESIGN PROFESSIONALS

The same Unilock® products available to homeowners are relied on by architects, landscape architects and engineers, to create world class commercial spaces across North America.

THE CHOICE OF THE BEST CONTRACTORS & CRAFTSMEN

Like a good artist needs the right paint, the best contractors use exclusive Unilock colors, textures and styles to showcase their creativity and workmanship.

PLAN

TURN YOUR DREAMS INTO REALITY

If you've never undertaken an outdoor landscaping project before, it can feel overwhelming. We're here to help. The pages in this section are designed to help you plan for a successful project.

Choosing a Contractor
Project Management Tips
Design Considerations
Outdoor Idea Center

CHOOSING A CONTRACTOR

Choosing the right contractor for your project is the most **important decision.** Even the best materials can be spoiled by poor installation and workmanship.

WORKMANSHIP

- ☐ Ask to see projects the contractor completed more than two years ago so you can see **how their work holds up** over time.
- ☐ Are the pavers laid in a way that minimizes awkward cuts? Are the curves of the project cut in a way that minimizes large gaps?
- ☐ Have edge restraints been used and still in place?
- ☐ How long does the contractor **guarantee** the work? How many warranty claims has the company had in the past two years?

SUB-CONTRACTING

Some contractors will hire other companies to perform parts of the work, like lighting and irrigation. Be sure to ask the contractor about these sub-contractors and how they will be managed.

RELEVANT EXPERIENCE

- ☐ How long has the contractor been installing pavers and walls?
- ☐ Has the contractor installed projects in the past with the features you're considering (e.g., a raised patio, retaining wall or water feature)?

BASE PREPARATION

- ☐ What are the contractor's base preparation methods? What materials are used and why?
- ☐ Is there a standard procedure for base preparation or will the contractor assess **your site's unique needs?**

HAVING TROUBLE FINDING A CONTRACTOR?

Contact us at **1-800-UNILOCK** or register online at **Unilock.com** to take advantage of our Unilock® Authorized Contractor referral program. We'll match you with a local contractor who is guaranteed to do the job right.

TIMING

- ☐ Ask the contractor how far in advance they are booking projects and **how long your project might take.**
- ☐ What is the contractor's payment terms?
- ☐ Is an upfront deposit required to **secure the timing** of the project?

DOCUMENTATION

- ☐ Does the contractor have the **proper licensing** for their work?
- ☐ Does the contractor have **liability insurance** and are employees covered by Workers Compensation?
- ☐ Will there be permits required for the job and if so, who is responsible to secure them?

COMPATIBILITY

- ☐ Do you like this contractor? Can you **easily communicate** and understand each other? Is this someone you can trust?
- ☐ Ask if the person you're meeting will be on site throughout the project or if someone else in the company will be your day-to-day contact person.
- ☐ Contacting **references** can help you understand how the contractor operates throughout a project.

DESIGN

- ☐ Does the contractor offer a **design service?** Is there a cost for this? Is the design hand drawn or rendered in 3D?
- ☐ Are the contractor's designs something you would like for your project?

PROJECT MANAGEMENT TIPS

1 | BUDGET

Ask your contractor to provide **good/better/best versions** of the project, or perhaps a budget that phases your project into several stages. Some contractors can even offer **payment plans** so you don't have to pay for your project right away.

2 | TIMELINE

Be sure to tell your contractor if there is a **deadline** by which the project absolutely must be completed. Rainy weather sometimes impacts the timing of projects, so be sure to understand what happens in the event of a delay.

3 | GROUND RULES

Your contractor's crew will be on your property on a daily basis. Agree to **ground rules** before the project begins. What time will work begin and end each day? What is their daily clean up routine? Where will products and equipment be stored on the site? Will they require access to your home or garage?

4 | COMMUNICATION

Establish in advance **who to contact if you have concerns** and how often you'd like your contractor to provide you with updates. If you notice something that doesn't look right on your project, be sure to let your contractor know right away.

5 | CHANGES

Even the best managed projects occasionally run into unforeseen circumstances. Be sure to understand the contractor's procedure for handling changes.

6 | PROJECT WRAP UP

If you're happy with the completed project, be sure to recommend your contractor to friends and neighbors, and **don't forget to register for your Unilock product warranty** at Unilock.com.

DESIGN CONSIDERATIONS

OUTDOOR LIVING

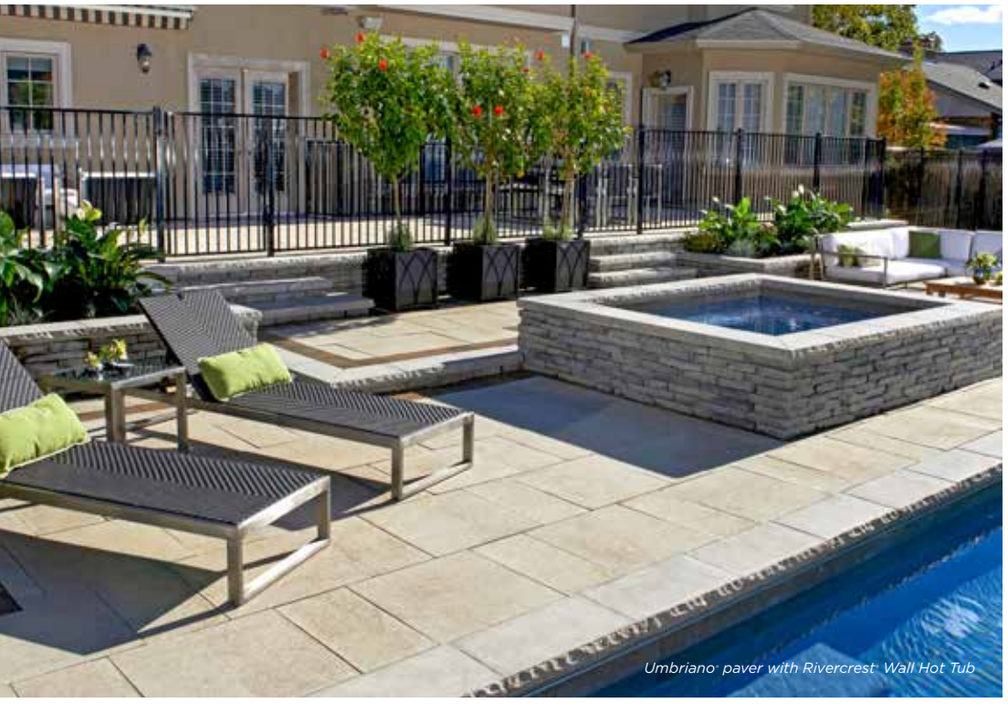
EXPAND YOUR HOME

A new outdoor living space can **add functional square footage** to your existing home by providing a new space to relax and entertain. Consider first how you would like to use the space, and then design it as an extension of your interior decorating style. Even a small space can appear bigger by using different paver colors, paver borders, elevation changes and seat walls to define distinct areas for cooking, eating and relaxing.

OUTDOOR ROOMS

Fire features are growing in popularity because they add visual interest and warmth that makes the space more enjoyable to use in cooler weather. Lighting installed in gardens, low walls, steps and pillars will also help draw people outside in the evening and adds visual appeal that you can enjoy from inside your home. Snow-covered pillars and walls can make beautiful accents to your property in the winter months.

Artline™ paver with Lineo® Dimensional Stone fire feature



Umbriano® paver with Rivercrest® Wall Hot Tub

POOL DECKS

SIZE MATTERS

When planning your pool deck, **four feet is the minimum perimeter** around the pool for basic access. However, if you intend to use the pool deck as a patio for entertaining or sunbathing, you'll need to increase this significantly. Be sure to keep in mind the size of your outdoor furniture; it's typically much bigger than indoor furniture!

SAFETY CONSIDERATIONS

The paver you choose for your pool deck deserves special consideration because you'll be **walking on it in your bare feet!** Be sure to choose a color that **won't absorb too much heat** from the summer sun. A smoother surface is pleasing to walk on, but make sure it's sufficiently **non-slip.** Umbriano® is our most popular choice for pool decks. For the coping around the edge of the pool, avoid products with abrasive edges. A contrasting coping color or inset border is also something to consider, as it helps define the pool edge.

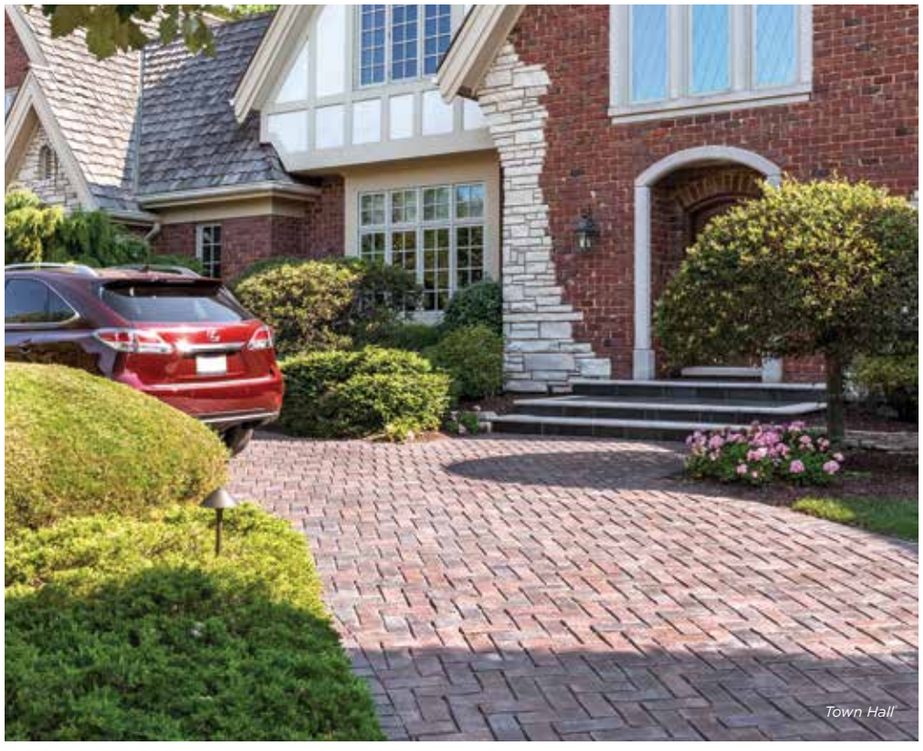
DRIVEWAYS

CURB APPEAL

A paver driveway is **an investment that adds instant curb appeal** and value to your home. When choosing a paver product it's generally a good idea to complement the main color of your home rather than to try to match it. Then, consider borders and accents to draw out specific colors from your home and create continuity. Consider adding vertical features like pillars, planters and decorative walls to further enhance the beauty of your driveway.

THINK GREEN

Permeable pavers **allow rainwater to flow between the joints,** through special base materials and into the subsoil below. This reduces puddling on the driveway surface when it rains, and reduces ice build-up in winter. It also provides a dual "green" benefit; not only does it reduce the amount of water that flows into storm sewers but it also provides moisture to surrounding plant material.



Town Hall

Artline with Lineo Dimensional Stone wall and pillar

Town Hall with Natural stone steps

ENTRANCES

WELCOME GUESTS

A great looking front entrance gives guests a warm welcome. Attractive steps that are wide enough to easily navigate, **low garden walls and planter boxes,** and smartly placed lighting all contribute to a cozy feeling that smooths the transition from the street to your home. As a general rule, the minimum width for any walkway is four feet.

A PLACE TO SIT

Even a modest front yard can usually accommodate a small courtyard seating space, where a morning coffee can be enjoyed or parents can observe their children playing with neighborhood friends.

VISUALIZING YOUR PROJECT DESIGN

A detailed design requires a great deal of time and effort, so you can understand why many contractors charge for this service in advance.

TRADITIONALLY, LANDSCAPE DESIGNS WERE HAND DRAWN TO SCALE ON GRAPH PAPER.

While there are many contractors and designers who still prefer to draw by hand, more and more plans today are being created digitally and in 3D.

If you're having trouble imagining what your project will look like when it's complete, a 3D design can really help.

HAVING TROUBLE FINDING A CONTRACTOR WHO CAN HELP VISUALIZE YOUR DESIGN? WE CAN HELP.

Contact us at **1-800-UNILOCK** or register online at **Unilock.com** to take advantage of our Unilock® Authorized Contractor referral program. We'll take the time to understand your project, and will match you with a local contractor who offers a 3D design service and is guaranteed to do the job right.

SELECT

CHOOSING THE PERFECT PRODUCT

Whether it's a classic paver or wall that you're looking for, or a luxurious product with all the bells and whistles of the latest technology, Unilock® has the perfect choice for your project.

CLASSIC

Our budget-friendly, Unilock Classic pavers and walls are manufactured to exceed ASTM standards for quality and strength. Available in classic shapes and styles, these products utilize a traditional product mix of large and small aggregates that is consistent from top to bottom with color mixed throughout.

STONEMARK™

The highly detailed surface texture of StoneMark products is created using Reala Technology. Combined with careful color blending, the result is surface texture and color variation resembling natural stone, but with the durability and precision of a manufactured paver or wall product.

ENDURACOLOR™

The refined surface of Unilock EnduraColor products is achieved with a **two step manufacturing process** that combines a base of coarser aggregates for a **stronger foundation,** with concentrated color and **wear-resistant finer aggregates on top.** This process protects the surface from the appearance of fading over time because the top layer prevents large, lighter color aggregates from ever showing through.

PERMEABLE

To reduce the amount of rainwater that flows off the surface of your new pavers and into storm sewers, consider a permeable paving system. Unilock permeable pavers have extra wide joint spaces and are installed on a special aggregate base so water flows through, replenishing the natural ecosystem.

ELEGANCE™

Deep, rich colors and a multitude of unique Reala™ textures combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can't get anywhere else and thanks to Ultima™ Concrete, the look you purchase is the look that will last, with up to 4x the strength of poured in place concrete.

Pebble Taupe and Dawn Mist Blend with Copthorne® (3 Color Blend) accent

ELEGANCE™

RICHCLIFF®

Inspired by the texture of natural cut flagstone, Richcliff offers superior durability and timeless appeal for driveways, patios, walkways and commercial projects. A multitude of stone textures were cast using Reala™ Technology, to ensure that finished projects will have a completely random, and natural appearance. And unlike natural stone, which can crack, split and fade, Richcliff is virtually indestructible. Ultima™ Concrete Technology makes Richcliff up to four times stronger than conventional poured concrete. A new large rectangle size is now available for use on its own or in combination with the traditional 3-stone random bundle for expanded patterning options and a larger scale look.

ELEGANCE™

COURTSTONE®

The polished look of Courtstone brings a luxurious, old-world elegance to driveways and walkways, with Ultima™ which provides up to four times the strength of conventional poured concrete. Using Reala™ Technology, the unique shapes of Courtstone were cast from real European cobblestones, but manufactured with a consistent base for efficient installation and superior interlock. It's a look that has remained popular for centuries. The stone's non-linear shape means it's possible to create smooth looking curves with minimal cuts. This, in combination with a rich color palette, makes Courtstone a frequent choice for borders and banding accents.

Heritage Red

ELEGANCE™

TOWN HALL®

The substantial proportions and unique color blending of Town Hall is modeled after historic North American clay street pavers. The timeless look makes it an excellent choice for driveways, patios, walkways and more, in either traditional or permeable applications. The rich colors and classic shape also make it popular for borders, banding and other accents in pavers, walls and vertical features. To ensure projects have a random appearance, Town Hall textures were cast from a multitude of different surfaces using Reala™ Technology, and Ultima™ Concrete Technology was used to create superior durability. The result is vintage, streetscape charm that stands the test of time.

ELEGANCE™

COPTHORNE®

Inspired by the rich color and timeworn beauty of European street pavers, Copthorne offers more delicate dimensions than Town Hall®. These proportions make it possible to design curved walkways and borders using Copthorne, without the need for cutting. Cast using Reala™ Technology for an authentic surface appearance, and using Ultima™ Concrete Technology to deliver up to four times the strength of conventional poured concrete, Copthorne offers timeless beauty for driveways, walkways, patios, vertical feature accents and more.

UNILOCK® COLLECTION OF

RETAINING WALLS & VERTICALS

Unlimited creative possibilities exist for retaining soil or building vertical features like grill islands and firepits. Now the durability of EnduraColor™ is available, thanks to our new U-Cara® multi-face wall system.

U-Cara® Steel Grey (Pitched) with Opal (Smooth) accent and Natural Stone coping

U-CARA®

The U-Cara Multi-Face Wall System represents a revolution in wall design.

This patented system, exclusive to Unilock®, is comprised of two basic components:

- Sure Track™ backer blocks provide dimensionally accurate structure
- U-Cara fascia panels provide unlimited design options

1 CHOOSE YOUR BLOCK

SURE TRACK STANDARD BACKER

FIREPITS & FIREPLACES

RIVERCREST FIREPIT KIT

This firepit kit is built with the Rivercrest® Wall. See page 119.

FIREPIT GRILL is included and fits securely into the firepit.

SUNSET FIREPIT KIT

This firepit kit uses Brussels Dimensional Stone®. See page 127.

FIREPIT INSERT

Firepit insert is included and fits securely into firepit.

ROUND

SQUARE

BELLA

The Bella pre-built fireplace and grill island are constructed from Rivercrest® Wall (page 119) and Universal coping (page 147).

BELLA FIREPLACE

BELLA GRILL ISLAND

TUSCANY

The Tuscany pre-built fireplace is constructed from Brussels Dimensional Stone (page 127) and Copthorne® (page 107) accents.

Units and colors may not be exactly as shown.

FIRE FEATURES

BRUSSELS DIMENSIONAL STONE®

This unique fire table and water feature combination is built using Brussels Dimensional Stone (page 127) with Natural Stone coping (page 85).

LINEO® DIMENSIONAL STONE

This contemporary firepit feature is built with Lineo Dimensional Stone (page 123) and Ledgestone™ coping (page 143).

RIVERCREST WALL

The fire table above is built using Rivercrest Wall (page 119) and Ledgestone coping (page 143).

U-CARA®

This custom fire feature is built using our new U-Cara Multi-Face Wall System (page 113) and Universal coping (page 147).

REMEMBER **To ensure a long lasting fire feature, direct exposure to extreme heat from an open flame should be avoided. Always construct fire features with a protective heat barrier such as a metal insert, refractory blocks or approved firebrick to prevent potential heat damage.**

PILLARS & WATER FEATURES

U-CARA®

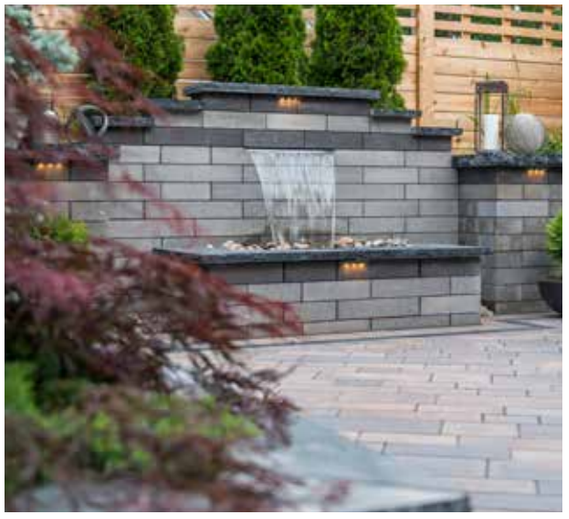
The unique pillar and seat wall is built using our new U-Cara Multi-Face Wall System (page 113) and Universal coping (page 147) with Ledgestone™ pillar cap (page 143).

BRUSSELS DIMENSIONAL STONE®

This double pillar entrance unit is built using Brussels Dimensional Stone (page 127) with Ledgestone pillar cap (page 143) and Town Hall® (page 101) accent.

RIVERCREST® PILLAR UNIT

The pillar above is built using the Rivercrest® Wall Rapid Pillar System (page 119) with Umbriano® (page 89) accent and Ledgestone (page 143) pillar cap.



LINEO® DIMENSIONAL STONE

This contemporary water feature is built using Lineo Dimensional Stone (page 123) and Natural Stone (page 85).

RIVERCREST® WALL

This poolside hot tub feature is built using Rivercrest® Wall (page 119) with Copthorne (page 105) accent Ledgestone coping (page 143).

BRUSSELS DIMENSIONAL STONE®

The unique water feature above is built with Brussels Dimensional Stone and Brussels Fullnose™ (page 145) with Ledgestone pillar cap (page 143) and Copthorne® accent (page 105).

LOOKING FOR SOMETHING DIFFERENT? **Speak to your contractor about using Unilock products to build a custom water feature or pillar that's just right for your project.**

GRILL ISLANDS

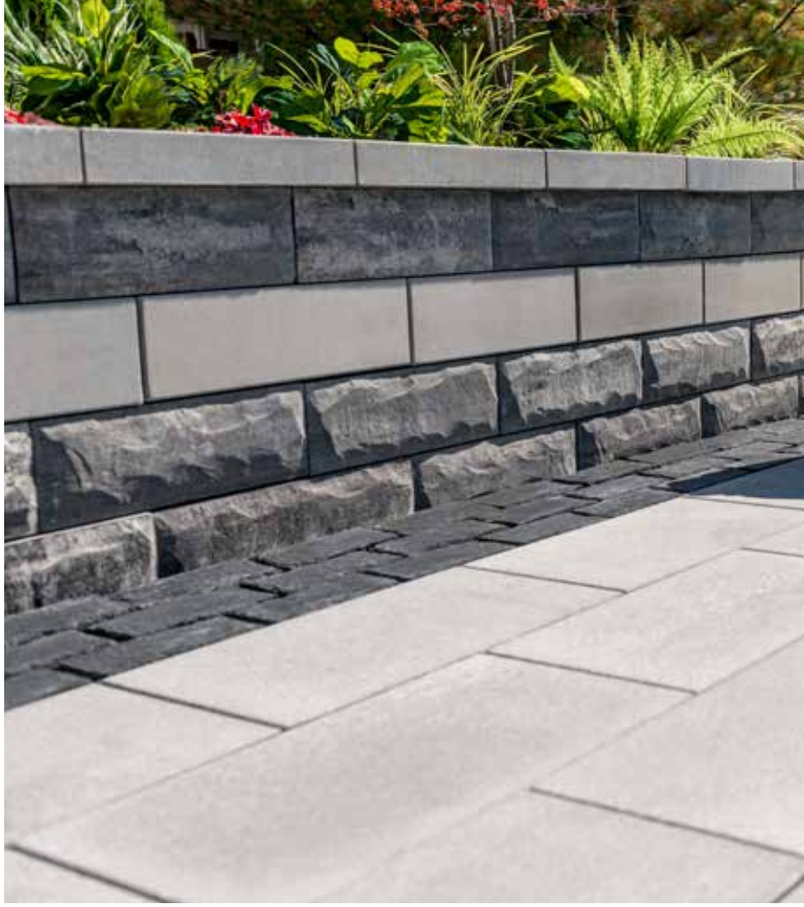
U-CARA®
This unique grill is built using our new U-Cara Multi-Face Wall System (page 113) with Universal coping (page 147) and porcelain tile (page 87) counter-top.

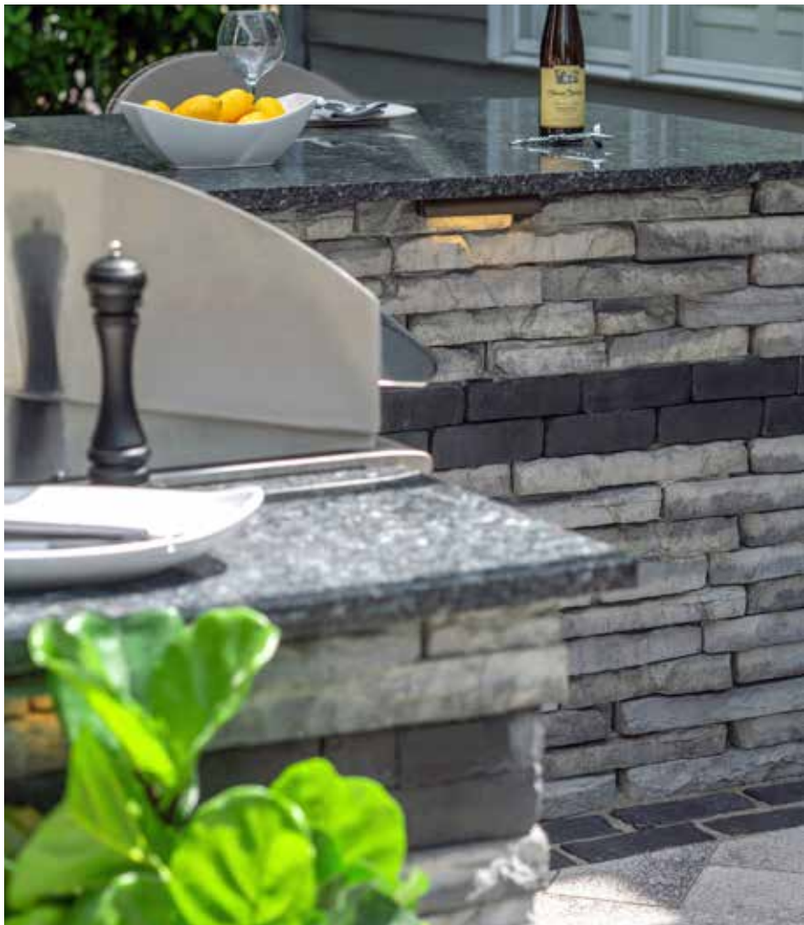
BRUSSELS DIMENSIONAL STONE®
The grill island shown above is built with Brussels Dimensional Stone (page 127) with Series™ (page 79) accent and Ledgestone™ (page 143) counter-top and coping.

LINEO® DIMENSIONAL STONE
This modern grill island is built using Lineo Dimensional Stone (page 123).

RIVERCREST® WALL
This exceptional grill island is built using Rivercrest Wall (page 119) with Umbriano® (page 89) accent.

LOOKING FOR SOMETHING DIFFERENT? **Speak to your contractor about using Unilock products to build a custom grill island that's just right for your project.**





WALLS

BORDERS & BANDING

Using contrasting colors and textures to band landscape walls and other vertical features is a popular design touch. These features can be coordinated with borders and banding in the paving portion of your project.

Quality

FOR US, IT'S PERSONAL

Over 40 years ago, our founder stumbled upon a unique little European product called the Uni-Stone. Intrigued by the benefits of this revolutionary paving method, he decided to license the product and bring the concept to North America. He purchased a basic paver machine from Europe and hired a small staff to produce the stones.

Founder Ed Bryant - circa 1972

In those days, most sales of Unilock® were to large-scale commercial properties and streetscapes. Any lapse in quality would be costly and would jeopardize our owner's personal reputation. So quality was of paramount importance.

From these humble beginnings, through to the multinational company we are today, Unilock has remained a family-owned company that puts quality first. For us, it's not just a matter of dollars and cents, it's our personal reputation that's on the line. Our customers - Homeowners, Contractors, Landscape Designers and Architects, across North America - can rely on us to supply them with **quality product every time.**

TRANSFERABLE LIFETIME GUARANTEE

We provide a Transferable Lifetime Guarantee on the structural integrity of our paving stones, slabs and retaining wall units for residential use. Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Color matching cannot be guaranteed and replacement labor is not included.
