Deep, rich colors and a multitude of unique Reala™ textures combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can’t get anywhere else and thanks to Ultima Concrete, the look you purchase is the look that will last, with up to 4x the strength of poured in place concrete.

Natural Edge and Fullnose Coping are available in the 2 Sandstone Colors - Indian Coast & Stone Cliff Grey, and in Limestone Black River.

All Unilock Natural Stone is sold by Full Crate Only.

Notes:
- The fine finishes of Unilock Natural Stone benefit most from application of breathable, penetrating sealants. Black River Limestone in particular, requires the use of proper sealants to keep its color true.

12” (9”) x 3” x 12”
30.5cm (22.9cm)
x7.6cm x 30.5cm

Notes: Colors shown should be used only as a guide. Colors should always be chosen from actual samples. Maximum height 27”-31.5” including the unit in the ground (depending on site conditions). To construct higher walls, contact a Unilock representative. Product is installed using Unilock Adhesive to secure corners and top row units. *20.9 sq. ft. face per bundle based on random pattern creating 12” solid wall. 32 sq. ft. face per bundle based on running bond creating 8” deep wall. **Coping End Caps are tapered on one side and straight on the other. Pins not available in Michigan market. Unilock adhesive should be used to secure units. Maximum height for planter wall is 16” under optimal conditions. Wall units and Standard/Corner units sold at factory in full bundle quantities. Ask your Unilock dealer about purchasing lesser quantities as necessary. All measurements are nominal.

BRUSSELS FULLNOSE™

COFFEE CREEK DESERT SAND LIMESTONE MAHOGANY ASH SANDSTONE

While supplies last

Notes: Can be used to create mantels for outdoor fireplaces and counter edging for outdoor counters. Units can be adhered to pool edge using Unilock Concrete Adhesive, or with mortar. Always observe proper construction techniques when adhering pavers to a surface. Consult your local pool contractors for installation specifics. All measurements are nominal. Colors shown should be used only as a guide. Colors should always be chosen from actual samples.
The SUNSET FIRE PITS (BRUSSELS DIMENSIONAL SYSTEM) section includes various stone options such as Coffee Creek, Limestone, Mahogany Ash, Sandstone, and Desert Sand. Each option is accompanied by images and specifications. Additionally, there is information on DURAHOLD2®, a natural stone product, with tables listing its various forms and specifications. The text also notes that all DURAHOLD2® is special order only, full bundles only, and that colors should be chosen from actual samples. It refers to terms and conditions for placement rates and provides contact information for Unilock representatives. A table is included with details on stones and bundling, including face feet, linear feet, units, per bundle, and lbs per bundle. The text also explains that square fire pits are no longer sold in kit form and can be constructed with Brussels Dimensional Standard Corner units and the available square fire pit insert (insert diameter 38”). It mentions that round fire pit units can be used to construct tree rings, small curved planters, etc. Furthermore, it notes that for DuraHold® and DuraHold2, Unilock, through Risi Stone® Systems International, can provide preliminary site engineering for most commercial projects. More information on soils information, site drawings, and loading requirements can be found at www.unilock.com. The text ends with a note about the availability of retaining wall engineering software, which is also available free of charge.

<td></td>
</tr>
</tbody>
</table>

Curved walls or steps can be constructed from a 31" outside radius when using all small units, 38" radius when using medium and small units, and a 48" radius can be constructed using all three wall units.

Internal Use Only. EWL ON
### LEDGESTONE™ PILLAR CAP, COPING, FULLNOSE & STEPS

**TECHNICAL ADVANTAGE**

Real™ Surface Technology
Ultra-realistic textures cast from natural stone, brick and historic cobblestones.

**Notes:** 4 Ledgestone end coping units can also be used to cap pillars larger than 20". That leaves a small opening for lighting. All caps require a skid that is refundable upon return in good condition. Coping is rock-faced on the front and the back; Closed-End coping and steps are rock-faced on three sides. Steps are rock faced on three sides. Both step units and pillar caps can be sold by the unit. All measurements are nominal.

Notes: Product sold at factory in full bundle quantities. Colors shown should be used only as a guide. Colors should always be chosen from actual samples. All measurements are nominal. Spacing strips are shipped with random wall bundles to create even spacing between units. Ask your Unilock representative for installation tips. Pillar Caps (28½”) are also available and are referred to as Lineo Pillar Caps. See Ledgestone Pillar Cap description above.

Internal Use Only. LDS MI
**Lineo Dimensional Stone**

Max Wall Height = 16''
Max Pillar Height = 48''

Assembly Notes:

1. Assemble only on frost free gravel base minimum 6'' thick.
2. Use only non-shrinking concrete adhesive.
3. Space plastic shadow strips and T-inserts as per diagram to prevent soil wash-through or to prevent visible light on seating walls.
4. Do not glue strips or T’s. The glue will not adhere to the plastic.
5. Always mound glue high enough that both layers of concrete will make contact with the glue.
6. Note: There is no specified pattern. Place units for most pleasing appearance. Avoid double stacked joints.
7. Use 16'' Pillar units to construct pillars and/or walls.
8. Shadow spacers are not recommended for use between coping and wall units.
9. Shadow Spacers are not required for units embedded below grade.

**Lineo Dimensional Stone** is a decorative wall stone intended for low seat walls and garden walls. (It is not an engineered wall system.) The stability of this wall will be affected by the amount and quality of adhesive used. Use concrete adhesives liberally in large dapples. Use adhesives with a minimal shrinkage factor.
For coping options, we recommend using Natural Stone or Ledgestone.

<th>Outside Radius (inches)</th>
<th>36”</th>
<th>59”</th>
<th>68”</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit sequence</td>
<td>Only 11.5” units</td>
<td>11.5”, 20”, 28.5”</td>
<td>20”, 28.5”, 20”, etc.</td>
</tr>
</tbody>
</table>

Notes: Any leftover pieces should be used on other parts of a project.
Notes: Colors shown should be used only as a guide. Colors should always be chosen from actual samples. Tapered units will allow for a minimum 5 ft. outside radius. To achieve this radius, you must use stones of the same taper on one layer, and stones of the opposite taper on the next layer. Higher walls can be achieved using geogrid reinforcement. 12" Coping bundle has 14 units of Closed-end coping (7 left and 7 right). Closed-end 12" coping not sold separately. Product sold at factory in full bundle quantities. Ask your dealer about purchasing lesser quantities as necessary. Unilock through Risi Stone® Systems International, can provide preliminary site engineering for most commercial projects. Soils information, site drawings, and loading requirements are some of the information details required in order to provide you with this preliminary site engineering. Contact your local Unilock representative for details. Retaining wall engineering software is also available free of charge at www.unilock.com.

**Pisa2® Calculations**

**Pisa2 Wall**

Step 1: Height of wall (includes buried course) x Length of wall = Square Face Feet

Step 2: Square Face Feet x 1.55 (units per foot) = Number of Double Units

Step 3: Number of Double Units x Cost per Double Unit = Cost of Material

**Pisa2 Corner**

Step 1: Height of wall in inches x Number of 90 degree corners in wall = Total Combined Inches

Step 2: Total Combined Inches / 6 (height of unit) = Single Corner Units Required

Step 3: Single Corner Units / 2 (sold by dbl. unit) = Double Units Purchased

Step 4: Double Units x Cost per Double Unit = Cost of Material

Note: Unilock provides these calculation formulas as a service for estimating material requirements. Unilock will not be held responsible in any way for resulting product overage or shortage.

**Notes:** Colors shown should be used only as a guide. Colors should always be chosen from actual samples. Random wall units sold at factory in full bundle quantities only. Rivercrest® is recommended for walls under 2ft. Ideal for straight or curved walls, seat walls, pillars, tree rings, planters, firepits and grill islands. Integrated connectors require no pins or clips. Minimum radius using equal amounts of each unit is 1.25m / 4.1ft. Using only units 1 & 3, a 1.055m / 3.5ft radius can be achieved. Unilock, through Risi Stone® Systems International, can provide preliminary site engineering for most commercial projects. Soils information, site drawings, and loading requirements are some of the information details required in order to provide this preliminary site engineering. Contact your local Unilock representative for details. Retaining wall engineering software is also available free of charge at www.unilock.com.

For more information please consult the Rivercrest installation booklet.

Internal Use Only. RVC ON
Cluster Set 1 - 70% / 30%

Utilizing the following Cluster Sets will create a wall with a 70% Standard to 30% Jumper ratio, and will use all Standard blocks equally throughout the wall. This will produce a wall with lots of jumpers, and short spans in between. Remember to match side A|A or B|B for straight walls and A/B or B/A for curved walls.

Cluster Set 2 - 60% / 40%

Utilizing the following Cluster Sets will create a wall with a 60% Standard to 40% Jumper ratio, and will use all Standard blocks equally throughout the wall. This will produce a wall with lots of jumpers, and short spans in between. Remember to match side A|A or B|B for straight walls and A/B or B/A for curved walls.

Constructing the Wall

Construct the wall by using a Cluster then Jumper, Cluster, Jumper, Etc., alternating the order of the Cluster Set. It is important make sure you utilize all the Clusters evenly throughout the wall to reduce waste. Add an extra Jumper block between clusters every so often to help randomize the wall.

For more information please consult the Rivercrest' installation manual.

LOOK INSIDE!

U-Cara fascia panels hang easily on the patented Sure Track™ backer block.

U-Cara Fascia panels can be placed anywhere along the Sure Track Backer Block, allowing for a variety of patterns, color and texture combinations not possible with other systems.
The U-Cara Multi-Face Wall System represents a revolution in wall design. This patented system, exclusive to Unilock, is comprised of two basic components:

- Sure Track™ backer blocks provide dimensionally accurate structure
- U-Cara fascia panels provide unlimited design options

UNILOCK ELEMENTS

PRE-BUILT FIREPLACES FROM UNILOCK

FEATURES:
- Installs in less time
- Built to exacting standards
- Coordinates beautifully with new or existing Unilock paving stones
- Built with UL-approved fireboxes and grills (gas units available)

CUSTOM SOLUTIONS
Custom designed solutions allow you to embellish with pavers, making it easy to match your patio borders and banding for that cohesive look and feel.

All Element fireplaces are pre-built in the factory and can be installed in any location accessible by forklift.

TUSCANY FIREPLACE
Shown with optional hearth and wood boxes
Sierra with Copthorne® 3-color blend accent.

ADDITIONAL ELEMENTS
BRICK OVEN
GRILL ISLAND

MODA SPECIAL ORDER
Bella and Moda are sold as shown. No available hearth or wood boxes, and no ability to customize.

The Moda pre-built fireplace is constructed from Lineo Dimensional Stone and Series™ accent.

BELLA SPECIAL ORDER
The Bella pre-built fireplace is constructed from Rivercrest® Wall.

Units and colors may not be exactly as shown.
Tuscany Fireplace

Guarantee: The standard Unilock guarantee applies to the units used to construct Unilock Elements. (See Unilock literature for details.) Third party grills and fireboxes carry their respective manufacturer’s warranty and may change without notice.

Note: Unilock reserves the right to change model designs, accessories and colors without notice. Unilock will not be responsible for improper use or handling that results in property damage. Some models may not be exactly as shown. Fireplaces come complete with UL-approved stainless steel fireboxes. Check local building codes and regulations prior to ordering and installing Unilock Elements.

Typical Cross Section for Concrete Pad Installation

Typical Cross Section for Concrete Pad Installation

CLEANERS, SEALERS & SANDS

POLYBIND™ SHAMPOO
CLN047 (1 Gallon) & CLN078 (5 Gallon)
Polybind Shampoo removes ground-in dirt from the surface of concrete pavers and natural stones. It will make pavers, patio slabs, walls and natural stones look clean and vibrant. Using Polybind Shampoo before sealer application will assure you of a deeper penetration into the cleaned surface. No muriatic acid in product – washes off with water.
Packaging • 1 & 5 gallon available • Box of 4 x 1 US gallon (24-1 gal boxes & 48-5 gal pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ OIL & GREASE CLEANER
CLN050
Polybind Oil & Grease Cleaner is effective in removing oil and grease from the surface of concrete pavers and natural stones. Easy to use - dissolves, dislodges and removes oil and grease. No hydrochloric acid in product - washes off with water.
Packaging • 1 quart container (6 per carton, 24 cartons per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ EFFLORESCENCE CLEANER
CLN045 (1 Gallon) & CLN046 (5 Gallon)
Polybind Efflorescence Remover will remove any efflorescence stains trapped in the concrete paver and natural stone pores. It will make the pavers look more clean and vibrant. This efflorescence cleaning is a necessary step before a sealer is applied. The sealer will be able to get a deeper penetration into the now-clean pores.
Packaging • 1 & 5 gallon • Box of 4 x 1 US gallon (24-1 gal boxes & 48-5 gal pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ RUST CLEANER
CLN051
Polybind Rust Cleaner is effective in removing rust from the surface of concrete pavers. Contains no muriatic acid.
Packaging • 1 quart container (6 per carton, 24 cartons per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ RUBBER, PAINT & TAR REMOVER
CLN049
Polybind Rubber, Paint & Tar Remover is effective in removing rubber, paint and tar from the surface of concrete pavers and natural stone. Easily washes off with water and is easy to use.
Packaging • 1 quart container (6 per carton, 24 cartons per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ SEALER STRIPPER
CLN068 (1 gallon) & CLN069 (5 gallon)
Polybind Sealer Stripper is extremely effective for removing either water-based or solvent-based sealers from concrete pavers or stone. It is environmentally responsible (water-based), yet it removes multiple layers in a single application. It is a paste which is easily applied with a brush or roller.
Packaging • 1 & 5 gallon (Box of 4 x 1 US gallon (24-1 gallon boxes & 48-5 gallon pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ OIL & GREASE CLEANER
CLN050
Polybind Oil & Grease Cleaner is effective in removing oil and grease from the surface of concrete pavers and natural stones. Easy to use - dissolves, dislodges and removes oil and grease. No hydrochloric acid in product - washes off with water.
Packaging • 1 quart container (6 per carton, 24 cartons per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ EFFLORESCENCE CLEANER
CLN045 (1 Gallon) & CLN046 (5 Gallon)
Polybind Efflorescence Remover will remove any efflorescence stains trapped in the concrete paver and natural stone pores. It will make the pavers look more clean and vibrant. This efflorescence cleaning is a necessary step before a sealer is applied. The sealer will be able to get a deeper penetration into the now-clean pores.
Packaging • 1 & 5 gallon • Box of 4 x 1 US gallon (24-1 gal boxes & 48-5 gal pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ RUST CLEANER
CLN051
Polybind Rust Cleaner is effective in removing rust from the surface of concrete pavers. Contains no muriatic acid.
Packaging • 1 quart container (6 per carton, 24 cartons per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ RUBBER, PAINT & TAR REMOVER
CLN049
Polybind Rubber, Paint & Tar Remover is effective in removing rubber, paint and tar from the surface of concrete pavers and natural stone. Easily washes off with water and is easy to use.
Packaging • 1 quart container (6 per carton, 24 cartons per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ SEALER STRIPPER
CLN068 (1 gallon) & CLN069 (5 gallon)
Polybind Sealer Stripper is extremely effective for removing either water-based or solvent-based sealers from concrete pavers or stone. It is environmentally responsible (water-based), yet it removes multiple layers in a single application. It is a paste which is easily applied with a brush or roller.
Packaging • 1 & 5 gallon (Box of 4 x 1 US gallon (24-1 gallon boxes & 48-5 gallon pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ WET LOOK SEALER SB
SEAL143 (1 gallon) & SEAL144 (5 gallon)
Polybind Wet Look Sealer is made from acrylic-based polymers. It penetrates deep into the concrete paver and natural stone pores, thus reducing the oil and dirt penetration, as well as protecting them from the corrosion of de-icing salt.
Packaging • 1 and 5 gallon available • Box of 4 x 1 US gallon (24-1 gal boxes & 48-5 gal pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ ECO SEAL ZERO GLOSS WB
SEAL149 (1 gallon) & SEAL150 (5 gallon)
Polybind Eco Seal Zero Gloss is 100% pure, high-grade acrylic used to seal concrete pavers, clay pavers and natural stone. It penetrates deep into the pavers and natural stone pores, thus reducing oil and dirt penetration as well as protecting them from the corrosion of de-icing salt.
Packaging • 1 & 5 gallon • Box of 4 x 1 US gallon (24-1 gallon boxes & 48-5 gallon pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.
POLYBIND™ ECO SEAL HIGH GLOSS SEALER + COLOR ENHANCER WB
SEAL185 (1 gallon) & SEAL186 (5 gallon)
Polybind Eco Seal High Gloss is 100% pure, high-grade acrylic used to seal concrete pavers, clay pavers and natural stone. It penetrates deep into the paver pores and natural stone pores, thus reducing oil and dirt penetration as well as protecting them from the corrosion of de-icing salt. It provides a high-gloss finish as well as vibrant color enhancement. Packaging: • 1 & 5 gallon • Box of 4 x 1 US gallon (24-1 gallon boxes & 48-5 gallon pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND™ RESEALER SB
SEAL155 (1 gallon) & SEAL156 (5 gallon)
Polybind Resealer penetrates the existing sealer and reactivates it to create rejuvenated protection of the paver surface, thus reducing oil and dirt penetration as well as protecting it from the corrosion of de-icing salt. Packaging: • 1 & 5 gallon • Box of 4 x 1 US gallon (24-1 gallon boxes & 48-5 gallon pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

POLYBIND ECO LOW GLOSS SEALER + COLOR ENHANCER WB
SEAL178 (1 gallon) & SEAL179 (5 gallon)
Polybind Eco Low Gloss Sealer + Color Enhancer is 100% pure high-grade acrylic for concrete pavers. It penetrates deep into the concrete paver pores, reducing oil and dirt penetration as well as corrosion from de-icing salt. Packaging: • 1 & 5 gallon available • Box of 4 x 1 US gallon (24-1 gallon boxes & 48-5 gallon pails per pallet)
Note: Carefully read all instructions and safety information on product label prior to application. For additional safety information, see SDS.

ADHESIVE

POLYBIND XTRA PERFORMANCE (XP) POLYURETHANE ADHESIVE
ADH035 (10 oz) & ADH038 (28 oz)
10 oz. Tube = 20’ at ¼” bead (12/case, 90 cases/pallet) & 28 oz. Tube = 52’ at ⅛” bead (12/case, 90 cases/pallet)
Polybind XP Adhesive is formulated for fast cure time, extra bond strength and durability. Applications include concrete pavers and walls, overlays, pool copings, steps and wall caps, wetcast and natural stones. It can be applied above 32° and on either dry or damp surfaces. Drying times vary depending on factors such as humidity, porosity, temperature and materials bonded together.

SANDS

NEW POLYBIND G2 COMPLETE SAND
SAND152 (Tan), SAND153 (Gray), SAND154 (Black), SAND155 (Ivory - Special Order in Full Skid Quantities Only)
Designed for paver joints up to a maximum of 4 inches. Drainage & Non-Drainage Applications (Overlays). No Dust – No Haze – No Blower – One Watering. G2 Complete Sand is the cleanest, fastest and easiest polymeric sand installed in the industry. It can be used with concrete pavers, wetcast and natural stones, and is recommended for use in patios, pool decks, walkways, driveways, parking spaces, etc. Packaging: • 50 lb bag • 56 bags per skid • 65-85 sq.ft. coverage per bag for narrow joints; larger joints will require more sand

SUREBOND JOINTING SAND
SAND001-1 (Tan) & SAND140 (Gray) This jointing sand will properly complete the interlocking of the segmental pavers because it is clean, angular and meets ASTM-C144 specifications. This type of sand is more stable in the paver joints and has the optimal gradation to ensure long term performance of the pavement system. Recommended for joints up to 3/4”. Washed, screened & dried Packaging: • 50 lb bag - 56 bags per skid

Installation practices may affect the amount of sand used per product. Review IMPORTANT NOTICE below.

## IMPORTANT NOTICE

1. **DO NOT USE** Polymeric Jointing Sand on the following products: Series™ Il Campo® Tribeca Cobble

   If joint stabilization is required, use ordinary jointing sand and apply a stabilizing sealer. **Contact your local Unilock office for recommended sealants and application specifics.**

2. **EXTRA CARE** must be exercised when using Polymeric Sand on the following products:

   - Courtstone®, Copthorne®, Richcliff®, Town Hall®, Umbriano®

   Polymeric Jointing Sand can be used on these products but the fine polymers and binders in Polymeric Jointing Sand have a natural tendency to adhere to the surface and therefore extra diligence must be taken to pre-clean the surface prior to “wetting the sand in” and squeegee off the surface post application. Failure to do so will result in a “whitish haze” on the surface that is difficult to remove.

3. **IMPORTANT COMPACTION NOTICE:** Always pre-compact the pavers WITHOUT SAND IN THE JOINTS. This will facilitate proper leveling. Polymeric Sand can then be swept into the joints. **Always use a compactor with a protective membrane attached to the bottom of the plate.**

   Polymeric Jointing Sand, cleaners and sealers, must always be applied by a trained and experienced professional. Contact your local Unilock office for training and the most up-to-date best practices.

   NOTICE: Unilock does not accept any responsibility for damage to the surface caused by the improper application and use of polymeric sand, sealers or cleaners. Unilock will not accept responsibility for alternate suppliers of polymeric sand, jointing sand, cleaners and sealers.
**TIPS FOR QUICK AND EASY INSTALLATION WITHOUT PRE-PLANNING**

**SnapEdge - One-Piece Edging That Does It All!**

*EDGE001*
- Only one part required for straight runs or curved installations
- Built-in connector fastens one piece to the next – convenient 96” size, makes them easy to transport
- Unique ‘Snip and Flex’ feature speeds installations of curves and corners without pre-planning
- The open design allows a root system to grow through SnapEdge, further reinforcing the installation
- Engineered to provide a strong, easy-to-install edge restraint for concrete/clay pavers
- Nail hole bosses are full-length cylinders. Hammer blows will not fracture or force nail heads through edging

**Product Information:**
- 8’ (96”) length pcs.
- Sidewall: 1 7/8”
- Pieces per Bundle: 24 (192 ln. ft.)
- Pieces per Pallet: 672 (5,376 ln. ft.)

**Polybind Edge Edging**

*EDGE056 - Rigid / EDGE061 - Tile Edge*
- Rigid has Twist & Lock connection system
- Rigid can be changed to a partial Flex by cutting the bridge support
- Tile Edge provides stability and strong lateral support for all porcelain tile installations

**Product Information:**
- Rigid:
  - 8’ (96”) length pcs.
  - Sidewall: 1 3/4”
  - Pieces per Bundle: 24 (192 ln. ft.)
  - Pieces per Pallet: 672 (5,376 ln. ft.)
- Tile:
  - 8’ (96”) length pcs.
  - Sidewall: 5/8”
  - Pieces per Bundle: 24 (192 ln. ft.)
  - Pieces per Pallet: 384 (3072 ln. ft.)

---

**EDGE RESTRAINT**

---

**TIPS FOR QUICK AND EASY INSTALLATION WITHOUT PRE-PLANNING**

**Sharp Inside Corner**
- For a sharp inside corner, cut one or two nail hole bosses and bend to desired shape

**Sharp Outside Corner**
- ‘Snip’ over and bend

**Gentle Inside Curves**
- ‘Snip’ and bend

**Gentle Outside Curves**
- ‘Snip’ and bend

**Proper Wall Installation**
- ‘Snip’ Snap Edge lengths together by inserting tongue on one piece into slot on adjoining piece

---

**UNILOCK**

---

42
**DRAINAGE, SEPARATION AND REINFORCEMENT**

**UNILOCK DRIVEGRID™ SYSTEM**
- 120’ x 13’ Roll - 1,572 sq. ft./56 lbs per roll

---

**GATOR GRID 30-30**
Gator Grid 30-30, a biaxial geogrid, provides strength, longevity, excellent stress transfer and prevents failure to the internal structure of landing areas, retaining walls and steep slopes. It has a high molecular weight as well as high-tenacity polyester yards which are woven in tension and finished with a PVC coating.
Packaging & Unilock SKU • 4’ x 50’ – FAB070 / 6’ x 150’ – FAB072

---

**GATOR FABRIC NON-WOVEN 3.5**
Gator Fabric Non-Woven 3.5 geotextile is ideal for drainage, filtration and will allow water flow in a paver or retaining wall application. It is designed for soil separation for added stability, has high strength and is dimensionally stable.
Packaging & Unilock SKU • 4’ x 100’ – FAB038 / 6’ x 100’ – FAB040

---

**GATOR FABRIC WOVEN 5**
Gator Fabric Woven 5 is a woven geotextile made from polypropylene yarns and can achieve higher tensile strength at low elongation. It is an excellent heavy-loading geotextile, ideal for driveways, alleyways, pathways and retaining walls.
Packaging & Unilock SKU • 4’ x 100’ – FAB049 / 6.25’ x 300’ – FAB052

---

**GATOR FABRIC POLYSPUN 8**
Gator Fabric Polyspun 8 geotextile is specially formulated to resist deterioration in garden and landscape applications. It creates a barrier to reduce weed growth and allows water, fertilizer and air to pass through.
Packaging & Unilock SKU • 6’ x 100’ • FAB064

---

**GATOR BASE**
FEATURES: For Pedestrian use only. Replaces concrete foundations and is used to replace 6” of crushed stone. The interlocking panels distribute all dynamic and static loads to a very wide area, practically eliminating any pressure on the ground.
GATOR Base is a unique evolution in base technology. Evacuates water through channels along a 1 slope. Manufactured using lightweight high-density polypropylene. Environmentally friendly and 100% recyclable. Extremely durable, will not degrade in the ground. Designed with LOCK-N-GO tongue and groove system.
Packaging: 10 units per pack, 12 packs per box, 120 units per pallet

Actual volume may vary due to type of materials, moisture content, and compaction. Calculation charts and formulas are provided as a service by Unilock for estimating material requirements. Unilock will not be held responsible in any way for resulting product overage or shortage.
UNILOCK PAVER PATTERNS
This Product Data Guide contains an extensive reference to patterns and designs. The purpose of these pattern swatches is to help the designer plan unique and exceptional designs. The percentages of products shown are based on the pattern and not on bundle configurations. In fact, there may be situations in which a pattern has been created with one particular size of stone, but that stone only comes packaged with two other sizes. This means that the designer will have to plan how the other components are used in the overall plan. This is usually accomplished by adding a border or an accent. As a result, overages or shortages may occur in certain patterns. The designer and/or installer of Unilock products accepts all responsibility for design and all associated costs incurred as a result of applying any of Unilock’s suggested design patterns in a project. Please plan your project and review your order carefully prior to ordering.

TRANSFERABLE LIFETIME GUARANTEE
Unilock provides a Transferable Lifetime Guarantee* on the structural integrity of our paving stones, slabs and retaining wall units to the original purchaser of the product for residential use. Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Color matching cannot be guaranteed and replacement labor is not included. Proof of purchase is required.

Excessive defective material (over the industry accepted normal of 2% for non-tumbled unit pavers) delivered to the purchaser will be replaced free of charge if a written claim is made within 5 days of delivery from the manufacturer. Such claims will not constitute reason for delaying payment. All goods shall be deemed accepted if completely installed. Inspect concrete products prior to opening bundle packaging to ensure that shape and color are as ordered. Unsatisfactory material must be available for inspection by Unilock to entitle the purchaser to any adjustment or credit. Inspect all concrete units during installation and set aside any which are chipped or cracked to use for any cut pieces required. The color of concrete products may vary significantly between production lots. Always install concrete units from several bundles simultaneously to ensure proper distribution of color. Prior to final compaction, inspect installed pavers for good color distribution. Relocate certain pavers, if necessary, to achieve desired color blend.

*Transferable Lifetime Guarantee: Register your project within 60 days of your dated proof of purchase to ensure your Unilock Guarantee is fully transferable! Simply go online at unilock.com and follow instructions. Once processed, you will receive an original Transferable Warranty Certificate for your records.

PRODUCT HANDLING WARNING
Bundle Straps Under Tension - Use extreme caution when removing or handling straps. Always wear gloves, goggles, safety footwear, and protective clothing when removing or handling straps. Failure to do so may result in serious bodily injury or loss of sight.
Cut all concrete products only in well ventilated areas. Inhalation of dust is a serious health risk. A “NIOSH” (US) or a “CSA” (CDN) approved respirator, safety goggles, hearing protectors, and gloves must be worn at all times. Always “wet-cut” or “wet grind” concrete products to minimize dust.
Do not stack bundled concrete products higher than 2 bundles high. Contents of the bundle may be unstable and subject to topple when stacked. Always use extreme caution and appropriate equipment when transporting or storing bundled concrete products. Failure to do so may result in serious bodily injury or death. Always obey gross vehicle weight (GVW) loading limitations and regulations.

Hazard Rating: Fire 0, Health 1, Reactivity 0. See MSDS Concrete Masonry (Pavers). Contact Unilock for complete sheet or view safety information at www.unilock.com.

Unilock assumes no liability or responsibility for loss or damage, resulting from the improper use or handling of our products, or from failure to follow instructions, warnings, and/or advisories on the product label, and on the MSDS sheet.
